Experience

Solo Projects Independent Developer   *May 2022 - Current*

- Collectorius -
    - Built A React WYSIWYG editor for building websites with no-code.
    - Built a system that automates registering domains, setting up SSL certs and launching static sites behind cloudfront.
- Leadect -
    - Lead generation and product insights using social media APIs, web-scraping and NLP.

Flexport Frontend Engineer   *Jan 2021 - Apr 2022*

- Worked on the frontend infrastructure team.
- Maintained and extended the React component library.
- Updated and extended our Design System, enforced design principles using: React props, typing, eslint rules, documentation and direct messages.
- Mentored and advised other teams on frontend best practices.
- Helped drive the Frontend migration from a Rails monolith to a GraphQL service. This involved rewriting several hundred components to use Graphql instead of REST. Updated documentation, advised teams, came up with systems to track migration progress.

Brightidea React, Full Stack Developer   *Jun 2018 - Oct 2020*

- Worked with React, PHP, Jquery and Backbone on a 25 year old codebase full of legacy code and quirks.
- Built the new commenting system, rewrote in React and added Richtext capabilities, user tagging, hashtagging and link previews.
- Improved build and deploy system for JS bundles.
- Rewrote portions of the mobile app using React Native, added a speech to text feature.

[Acutulus](#) Full Stack Developer   *Jan 2015 - Nov 2017*

- Worked for many different clients building full stack and mobile application MVPs.
- Primarily used AngularJS, NodeJs, Ruby on Rails and Ionic.
- Built MVP for several clients who went on to close large funding rounds and are still in business 6+ years later: [Myhippo](#), [Katalyst](#)

Technical Skills

Specialties: React, React Native, NodeJs, NextJs
Proficient: PHP, Rails, Django, Python, SQL, AWS, Azure, All the JS tools (npm, yarn, webpack, typescript, jest), terminal skills, and many more of the billion things a modern developer needs to know ;).

Testimonials

Eric is a hard working engineer. He adapted to the company's style and workflow quickly, while mastering new frameworks and technologies. Eric is enthusiastic about projects, he remains focused and is able to prioritize. He continues to produce optimized, reusable code while learning whatever is needed to produce the best product. As a small company we all have to fill various roles and be able to work independently, Eric excels at this. Whether it is coding new applications from the ground up, debugging and optimizing existing code, or coordinating with customer engineering teams, he succeeds at the task at hand.

Ed Parsons, CEO Acutulus Enterprises
